

Ransohoff's New and Improved Lean-Jet™ Rotary Basket Washer Parts Washer

Lean-Jet™ is an all new "Right Sized" and "Right Priced" industrial duty, aqueous based parts cleaning system specifically designed for use within lean or cellular manufacturing processes. This advanced technology, high performance cleaning system surpasses the most stringent part cleanliness requirements in a reliable, very compact and easy to service configuration. The Lean-Jet™ rotary basket washer consists of multi-stage rotational cleaning, rinsing and drying in a common chamber eliminating the need for a part transfer system. The Lean-Jet™ is an ideal parts cleaning system for industries that require high performance cleaning of small to medium sized parts in low to medium volumes;

Such as screw machine-parts, fasteners, precision machined and formed parts and other hard to clean components. The Lean-Jet™ is an excellent alternative for anyone who is looking to purchase an economically priced cleaning system that provides unsurpassed cleaning and drying performance in an easy to service and compact footprint.
