Ransohoff Unveils Cutting-Edge Cleaning Solutions at IMTS 2024

June 2024 – Cincinnati, Ohio

Ransohoff, a division of Cleaning Technologies Group and a global leader in innovative cleaning and waste minimization technologies, is set to debut its latest advancements at IMTS 2024, taking place from September 9 to 14, 2024. Visitors to Booth #338774 will have the opportunity to explore a diverse range of new products, technologies, and services designed to revolutionize industrial cleaning processes.

One of the highlights at the exhibition will be the LeanVeyor Conveyor Parts Washing System. Engineered specifically for lean manufacturing environments, the LeanVeyor system maximizes efficiency while minimizing floor space requirements. Featuring a pragmatic approach to component selection and placement, it ensures quick and accessible service. Insulated stages with individually adjustable exhaust dampers reduce heat loss, optimizing energy efficiency. The system is crafted for durability, flexibility, simplicity of operation, and ease of maintenance, accommodating processing on a flatwire belt or custom fixtures. Optional ultrasonic stages and automated loading/unloading capabilities further enhance its versatility.

"Our participation at IMTS 2024 underscores our commitment to delivering innovative solutions that meet the evolving needs of our customers," said a spokesperson from Cleaning Technologies Group. "We look forward to showcasing how these technologies can significantly improve cleaning efficiency and operational sustainability."

Technical experts will be on-site to provide detailed insights into the showcased technologies and offer personalized recommendations to enhance cleaning processes.
